Slash Commands Cheat Sheet

SN Utils

Navigation, development and instance tools. Type a command, then press Enter.

Ctrl+/ on Windows/Linux | ⌘+/ on Mac

Ctrl+Enter: force a new tab | →: inline results where supported

Many options can be configured in /manage > Settings, including shortcuts and UI behavior.

Navigation

`/incident`	Open a table list
`/tsk INC0012345`	Find a task by number
`/me`	Your user record
`/m users`	Next Experience All menu
`/tab esc`	Employee Center in a new tab
`/list`	Current record in list view
`/env dev`	Same page on another instance
`/pop`	Toggle framed / standalone view

Configuration search

`/br name`	Business Rules
`/cs name`	Client Scripts
`/si name`	Script Includes
`/ua name`	UI Actions
`/up text`	UI Policies
`/p name`	System Properties
`/u name`	Users
`/acl incident write`	ACLs by table and operation
`/tables name`	Discover table definitions
`/log error`	Today's matching system logs

Replace name/text with a search term. Predefined commands accept words: `/p ui.session`. Dynamic tables need a field filter, e.g. `/incident -short_description:vpn`, or an encoded query.

Form & editor keys

`Ctrl+S`	Save the record
`Ctrl+Shift+S`	Insert and stay, when supported
`Ctrl+Alt+[`	Previous record
`Ctrl+]`	Next record
`Ctrl+V`	Paste image as attachment
`Alt+Shift+W`	Code Editor tab: word wrap

On Mac: ⌘ replaces Ctrl; Option replaces Alt. Previous record deliberately uses Alt; next record does not. Enable Prioritize Shortcut in Settings if ServiceNow captures Ctrl+/.

Slash Command Keyboard Navigation

`→`	Preview matching records inline
`↑ after opening`	Browse command history
`↑ / ↓`	Navigate suggestions or history
`Tab`	Select command or table name
`Shift`	Toggle numbered result selection
`1-9`	Open result (green numbers)
`Ctrl+Enter`	Force open in a new tab
`Ctrl+Shift+Enter`	Force open in the current tab
`Escape`	Close the slash window

Development tools

`/st | /sns`	Classic / new ServiceNow Studio
`/uib`	UI Builder
`/fd | /ws`	Flow Designer / Workflow Studio
`/bg`	Background Script
`/bgc`	Script template for current record
`/bgl`	Script template for current list

Scope & session

`/sa name`	Switch application scope
`/su name`	Switch update set
`/usd`	Use scope default update set
`/imp username`	Impersonate a user
`/unimp`	Stop impersonating

Recent commands

`/last`	List recent commands
`/last imp`	Filter recent commands

Mouse shortcuts

`Ctrl+click label`	Build a list filter
`Double-click ref`	Open reference in a new tab
`Shift+click ?`	View Data popup

Filters & Record Tools

SN Utils

Dynamic time switches, record inspection, update sets and activity.

Switches

`-a`	Active records
`-s`	Current application scope
`-m`	Updated or created by me
`-um / -cm`	Updated / created by me
`-ut / -ct`	Updated / created today
`-uct`	Updated or created today
`-ou / -oc`	Newest updated / created first
`-p`	Keep the filter pinned
`-f`	Filter only, with filter bar pinned
`-n / -r`	New record / random record
`-t / -c`	Table structure / configuration
`-ra / -erd`	REST API Explorer / schema map

Apply to a table command, or the current list/form with `/-m`.

Dynamic time switches

`-u5d`	Updated: last 5 days
`-c3h`	Created: last 3 hours
`-uc15m`	Either: last 15 minutes
`-um1w`	Updated by me: last week

Standalone -c opens configuration; c in -c3h, -cm and -ct means created.
Types: u/c = updated/created; uc = either;
um/cm = updated/created by me.
Units: s seconds, m minutes, h hours, d days, w weeks, M months, q quarters, y years.
Case matters: m = minutes; M = months.

More everyday tools

`/rnd`	Random data in visible fields
`/code term`	Search script code (GraphQL: Pro)
`/sk` PRO	Open Sidekick debugging tools
`/link` PRO	Copy rich hyperlink to clipboard

Record tools

`/tn`	Toggle technical names
`/uh`	Reveal hidden form fields
`/vd`	Current record data overlay
`/xml | /json`	Current record as XML / JSON
`/versions`	Current record version history
`/diff1`	Load left record for comparison
`/diff2`	Load right record and compare
`/diffenv dev`	Compare same record across instances
`/copycells`	Copy selected list cells
`/copycolumn`	Copy selected list column

Add `-s` to either command to copy sys_ids rather than display values.

Update sets & activity

`/usm`
Update Set Manager. Browse and switch: Free. Create, rename, bulk, parent, complete, preview and move updates: Pro.

`/activity` PRO
See artifact changes, authors and version comparisons.

`/activity window` PRO
Open Live view in its own window.

Settings & custom commands

`/manage`	Extension settings
`/newcmd`	Create command; AI Builder: Pro
`/newsnip` PRO	Create a code snippet
`/help | /cheat`	Docs / complete cheat sheet

Full reference: snutils.com/docs/guide/slash-commands/cheatsheet
Pro: cloud sync, backups, snippets and advanced tools. Trials cover selected in-browser features; cloud sync and AI Builder require paid Pro.
